## WELCOME

To the first edition of What's Happening at Wecon Systems "WHAWS" newsletter for the year 2015. The early winter season has provided most of us with challenges just getting back and forth to work, but fortunately for us we didn't encounter the extreme weather the Buffalo area experienced. Due to year end commitments, our field technicians have kept busy throughout much of the Christmas season. We thank them for their efforts. On a positive note, our customers are extremely happy with our efforts to accommodate them during this hectic time of the year. We hope you had a great Christmas break and are ready to begin another successful year.

New business opportunities have grown and have continued to develop this past year. We will be returning to a couple of larger projects that have temporarily been put on hold until early in the New Year. We welcome all of our new business associates. To all of our customers and suppliers, thank you for supporting our requirements and allowing us to satisfy your material handling needs. If you have any questions, are interested in any of our products or require a material handling solution please don't hesitate to contact any of our professional sales associates. Be sure to check our website on a regular basis to view our used options and monthly specials and check the news & events tab to keep updated on what's happening at Wecon Systems.

## Our Annual Christmas Celebration

This year's celebration took place at the Keg Steakhouse + Bar in the Heartland Center in Mississauga. The Keg provides an accommodating dining experience to satisfy any appetite in a casual warm atmosphere. The ambiance is congenial and inviting, providing patrons with surroundings that are both charming and appealing. Due to the increasing size of our group it is a difficult chore for most establishments to accommodate us. We were seated in a somewhat secluded area that allowed for an uninterrupted and private celebration. The serving staff was more than accommodating to our large group. For our pleasure they put together an assortment of various starter dishes for our enjoyment prior to bringing out the main meals. The Keg provided an extensive assortment of food choices with generous portions satisfying all appetites. If you are looking for somewhere to hold your next corporate event, please give them a call.

## On-Going and Completed Projects

- We recently completed the installation of a Mini Load Automated Storage and Retrieval System supplied by our Business partner TGW-Systems at the new distribution facilities for a hardware distributor in Kitchener. Wecon provided the implementation and installation services for the (5) 40 foot high vertical storage and retrieval machines (SRM's).
- Our technicians have completed the installation of the initial phase including the relocating of a sorter at a major supplier of print and promotional products in Windsor. A major Material Handling player contacted us to provide the "local" installation services for the equipment they supplied. Phase 2 is scheduled to commence early this year. Long hours and an extremely tight installation window were borne by several individuals during this installation. A special thanks goes out to all those involved.
- The balance of decommissioning, reconfiguring, installation and commissioning of the new transportation and sortation system at an e-commerce distribution center in Scarborough has been deferred until the New Year due to their e-commerce commitments during the holiday season.
- Wecon continues to add additional avenues to its installation activities. We have been contracted to provide the installation services for a car turntable system in Metropolitan Toronto. Installation scheduled to commence early in the New Year.
- We continue to carry an extensive inventory of used equipment available for sale at tremendous savings. This used equipment is refurbished providing the customer with a comparable product at significant cost savings over the purchase of new equipment. Contact any of our sales professionals for details regarding availability of equipment types and sizes.

## New Products

In conjunction with the installation of two mechanical parking systems in Metropolitan Toronto, Park & Stack Corporation has contracted us to install a car turntable system. This system provides 360 degree rotation for narrow and limited access facilities. In restricted garage layouts where turning maneuvers are difficult or limited, the vehicle can easily be turned to the desired position enabling the driver to easily vacate the space. Park & Stack Corporation is the Canadian agent for SpaceSaver Parking Corporation who are the North American distributors for the parking systems. They offer and provide a cost-effective and reliable solution to your parking problem.
