Welcome

To the October edition of our What's happening at Wecon Services "WHAWS" newsletter. The Summer season turned out to be a very busy time for us, with a couple of larger projects into the installation phase, manufacturing at a steady pace and our on-going service commitments on the rise. While all this was going on we were still able to organize and execute a couple of our most anticipated annual events with very exciting feed back from everyone that was part of them. Make sure you check out our news and events tab on our web page on a regular basis to keep updated.

What's Happening At Wecon Services

New Team Members

We are very excited to announce the addition of a few new team members.

Mr. Richard Liang has joined us in the design/engineering department and will help with implementing our new Solid Works CAD software as our new standard. Richard comes to us with years of CAD experience and has already shown some of our customers the great advantages we can offer.

Richard can be reached anytime in the office at ext. 24 or at rliang@weconservices.com.

Mr. John Granberg has now come on board as a full time team member. John joins us as our Senior Controls Designer. We have been contracting work with John for about 10 years already so most of you probably have already had the pleasure of working with him. John brings with him an extensive background in electrical design, controls applications and advanced PLC programming largely in the Material handling industry.

John can be reached in the office at ext. 26 or at jgranberg@weconservices.com any time.

Mr. Dave Totty has also joined us as a welcomed addition to our Service/Installation team. Dave has a long history of experience in the service and installation field of material handling equipment so most of you have probably met him through other channels, but now he is back at home here with us and we could not be happier.

Dave is rarely in the office but he can always be reached at service@weconservices.com.

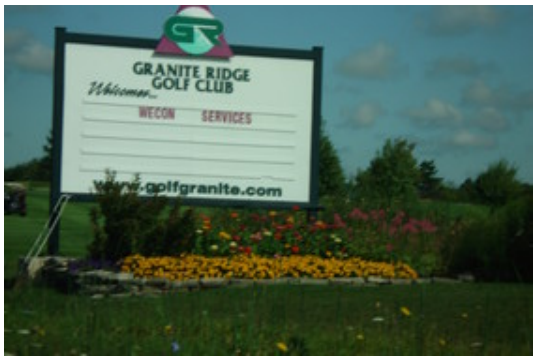
Annual Events

Our annual BBQ was held on July 17, 2008 and was once again a huge success, perfect weather, an over abundance of great food and the best "work family" we could ask for all added up to a fantastic day enjoyed by all, thanks to everyone that was able to join us.

Our annual Golf Tournament was held on August 20, 2008 at Granite Ridge and was maybe the best yet, we were at capacity, mother nature co-operated and of course the food was great, all which meant smiles were seen all around.



Thanks again to everyone that was able to take time out of their busy schedules to join us, we look forward to seeing you again next year.

New Systems Division

You talked, we listened.

"I want to deal with one single point of contact" is a common statement we hear from customers when assigned the task of implementing a new Material Handling System or revamping an out dated one, so after almost 12 years of steady success in the conveyor world, Wecon Services Ltd is extremely excited to announce the creation of our new "Systems Division".

Starting in September 2008, you may notice some small changes to the name and the logo but the big changes will be in the way we will be able to completely satisfy all our customers with Systems requirements. Over the course of the last year and a half we have solidified business partnerships with some of the most well respected material handling manufacturing companies in the world, allowing us to provide our customers with the best of all worlds, volume based pricing, cutting edge technology and hands on experience. This combined with the recent additions to our in house seasoned professionals adds up to an un-beatable win-win solution for everyone.
