WELCOME

To the fourth and final edition of What's Happening at Wecon Systems "WHAWS" newsletter for the year 2018. This past summer was much more in line to what we normally expect. More seasonal temperatures and only a few days with unbearably high temperatures and unrelenting humidity. For those of you that took your vacations during the summer months you were probably treated to an abundance of favorable weather conditions conducive to what you would typically expect for that time of the year. The first day of fall (autumnal equinox) has come and gone. The Farmer's Almanac is predicting colder, wetter and more unsettled weather as we move into the fall and towards the winter months. The transition to fall is now upon us with the days growing visibly shorter as the nights become increasingly longer. With the change in seasons, trees have begun and continue to change colours and shed their leaves. Daylight savings time ends on November 4, 2018 in conjunction with the clocks being turned back providing us with more light in the morning. It won't be long before that dreaded four letter word is upon us. As summer has drawn to a close and autumn progresses, we take a moment to look back.

This past summer our installation and service crews have continued to maintain a busy schedule. In addition to numerous local installations, several of our technicians have been involved with out of town installation projects. They have experienced long drives to and from the various installation sites in conjunction with long hours to satisfy our customer's needs and requirements. We thank them for their perseverance and efforts. In house we are continuing to restructure the layout of our plant in an effort to streamline our manufacturing and assembly processes to benefit both our customers and ourselves. The goal of this is to help us compress manufacturing lead times providing our customers with quicker deliveries. The workload over the next few months continues to be extremely busy with several new and larger installation projects ramping up. As always, we continue to direct and manage our manpower requirements to best satisfy our customer's needs. We are fortunate that our team is comprised of a diversified group of individuals that can be called upon to help out during those busy times to keep up with our customer commitments.

If you have any upcoming projects we would be happy to discuss the opportunities with you or your prospective client(s). If you have a question or inquiry, don't hesitate to call. Please remember, we can always find the time to support your day-to-day needs and requirements. To all of our customers and suppliers, thanks for supporting our requirements and allowing us to satisfy your material handling needs. Feel free to contact us at any time concerning your material handling questions or requirements. Be sure to check out the news and events tab on our webpage on a regular basis to keep updated on our current business activities.

On Going and Completed Projects

- We have completed the installation of the picking and distribution system for a Calgary based warehousing and distributing center. Wecon oversaw and coordinated all phases relating to this project.
- The mechanical and electrical installation of the conveyor system and platform supplied by third parties to a Canadian discount store chain distribution center in Eastern Ontario has been completed. Wecon coordinated all phases of mechanical and electrical installation for the project.
- Wecon coordinated all phases of electrical and mechanical installation activities for a global footwear distribution facility in eastern Ontario. We received a glowing “Thanks” from their Maintenance Manager complementing our Installation Manager Jim and his team who were not only professional and skilled in their duties but also exemplified the teams detail to attention and customer service.
- We have a couple of jobs on the go to support a highly recognized social service institution. Wecon has been contracted to supply the equipment and installation including overseeing the electrical installation of the equipment for those sites.
- Wecon was awarded the contract to supply the order fulfilment system for a new distribution centre in Mississauga for an iconic Canadian clothing retailer. We will play a major role in implementing the exciting new technology associated with the project and oversee all phases of the job. Wecon has been contracted to provide service coverage for the site once it has been turned over to the customer.

We maintain a wide assortment of good quality of used equipment that is available for sale. By providing customers with the option of supplying used equipment in lieu of new equipment the customer can realize the benefit of significant cost savings over the purchase of new equipment. Since used equipment changes hands in support of customer requirements, if you are looking for that special piece of equipment or simply just looking for something to help enhance your productivity please contact us for details and equipment availability.

Our sales staff and distributors have been busy quoting and actively pursuing new business opportunities. They are always available to assist and answer any customer inquiry. They can be reached at Wecon Systems by calling (905) 624-6499 or alternately they can be contacted via e-mail at: info@weconsystems.com, sales@weconsystems.com or service@weconsystems.com

A Helping Hand

The 7th Annual Steps to End Violence Against Women Walk was held on August 26, 2018 at J.C. Saddington Park in Port Credit. Wecon put together a team of “Walkers” to help raise money for a very worthy cause Interim Place. In appreciation of our team’s efforts and commitments Wecon was awarded the “Best Team” and “Trendsetting Team Award”.

A Career Opportunity

Here we grow again. Due to our continued and expanded growth, we are looking for several individuals to augment our team of professionals. We are looking for individuals to fill the positions of Conveyor Service Technician, Lead Hand, and Assembler / Fabricator. If you know of anyone who may be interested in a career in any one of these disciplines please have them contact us to discuss the appropriate opportunity.

Milestones

We are proud to announce the 10th anniversary of Dave Totty at Wecon Systems. Dave celebrated this noteworthy occasion on September 16th, 2018. Dave has been instrumental and has taken an active role in representing Wecon as a liaison and a highly respected voice between us and the customer. Dave is responsible for taking an active role in our installation and service activities and always lends a hand where needed. Please take a moment to congratulate Dave on reaching this significant achievement. If you need to contact Dave he can be reached at Wecon Systems by calling (905) 624-6499, on his cell phone (905) 578-0819 or alternately via e-mail at: dtotty@weconsystems.com.
