## WELCOME

To the second edition of What's Happening at Wecon Systems "WHAWS" newsletter for the year 2018. It appears as though the ground hog was wrong in its prediction and the 6 more weeks of winter that was predicted is drawing to a close. Whichever way you want to look at it, the end of winter seems to be here. If you are like most of us, people want to see the end of winter and the onset of spring. Daylight savings time has begun. The schools "spring break" has concluded and the Vernal Equinox (first day of spring) has come and gone. The days are getting longer allowing us to enjoy the extended periods of sunlight accompanying the transition. People are emerging from their winter abodes to enjoy the transition and arrival of the new season. For many of us, it has provided us with an opportunity to get a head start on the ensuing spring chores. We are beginning to see the arrival of birds from their winter migrations and hearing the calls and songs that accompany them. Animals are emerging from their hibernation routines. As the ground and temperatures begin to warm, the trees have begun to bud and spring bulbs have started to sprout and bloom. The opening of golf courses and the startup of the Major League Baseball regular season signifies that spring has arrived. It will only be a matter of time and we will be looking to the onset of the Victoria Day statutory holiday commonly referred to as the "May two-four weekend".

As winter has eclipsed into spring our teams continue to maintain a busy schedule. Manpower requirements continue to be juggled to provide our customers with the utmost coverage during all activities. Several of our technicians have spent numerous weeks away from home tending to several out of province installation activities. We thank them and our entire team for their efforts. The shop continues to undergo a major face lift to improve and streamline our capabilities to serve you better.

As the year progresses our customer base continues to grow. Welcome to our new business associates. To all of our customers and suppliers, thanks for supporting our requirements and allowing us to satisfy your material handling needs. Feel free to contact us at any time concerning your material handling questions or requirements. Be sure to regularly check the blog and newsletter tab on our web page [www.weconsystems.com](http://www.weconsystems.com) to keep updated on our current business activities.

## On Going and Completed Projects

- The mechanical installation of the conveyor system for a third party customer at the new distribution center for a women's apparel boutique in British Columbia has been completed. Wecon coordinated all phases of the mechanical and electrical installation for the project.
- The installation of the picking and distribution system for a warehousing and distributing center in Calgary is in its final phases and drawing to a close. This project was awarded to us based on our past performance locally with this customer. Wecon provided the mechanical installation for the job and was responsible for coordinating all phases of this project.
- We have been awarded the installation of a two level quad pallet lift supplied by a third party at a major bakery facility for the food service and retail market located in Metropolitan Toronto.
- We have been awarded the decommissioning of a distribution warehouse north of Toronto and its subsequent turnover to the new tenant for warehousing activities. The job is in its preliminary stages and will provide a significant amount of used equipment consisting of 30" wide MDR conveyor, light duty racking and miscellaneous shelving approximately 3ft x 3ft x 7ft high that is available for resale. For details concerning this equipment please contact us.

## On Going and Completed Projects

- We have large assortment of good quality used equipment available for sale at tremendous savings. Included in this is a significant amount of used 24" and 36" nominal width lineshaft, 30" nominal width sliderbed conveyors and 18" wide nominal width 1.9" gravity conveyors on 4" centers available in our used equipment inventory. This used equipment is refurbished providing the customer with a product comparable to new at a fraction of the cost. Customers continue to realize the benefits of incorporating used equipment into their projects as it can be supplied in most cases quicker and at significant cost savings over the cost of new equipment. On-hand used equipment inventories continually change and are subject to sales volumes. Contact any of our sales professionals for details regarding availability of equipment types and sizes.

If you have any conveyor or material handling inquiry, please give any of our experienced and qualified installation, service or sales staff professionals a call and they would be happy to assist and help answer any of your questions. No matter the size or nature of the project you may be considering, contact any of our specialists to ensure all phases of the job are covered. They can be reached at Wecon Systems by calling (905) 624-6499 or alternately they can be contacted via e-mail through: [info@weconsystems.com](mailto:info@weconsystems.com), [service@weconsystems.com](mailto:service@weconsystems.com) or [sales@weconsystems.com](mailto:sales@weconsystems.com). Our team of professionals generates "Guaranteed Results".
