Welcome

To the July edition of our What's happening at Wecon Services "WHAWS" newsletter. Spring has sprung and we have been very busy with a couple of great new projects. With summer now well under way our installation crews are busy for the next few months, but, as always we have some buffer to continue taking care of your day to day requirements. Make sure you check out our updated web page for all the latest news and events on a regular basis.

What's Happening At Wecon Services

10 Year Anniversary

We are proud to acknowledge the 10-year anniversary of Mr. Kurt Witteman. Kurt celebrated his ten-year anniversary in May of this year. Kurt has played a major roll in helping grow Wecon to where we are today as our National Sales Manager. Most of you already know Kurt, so join us in congratulating him on this great achievement, if you have not had the pleasure of meeting Kurt feel free to contact him anytime. Kurt can be reached through the office anytime or at kwitteman@weconservices.com

Annual BBQ

It is that time of year again and we could not be more excited! Our annual BBQ has become one of the highlights of the summer for us; it gives us a chance to take a bit of a break from our everyday hustle and bustle. It is also a great opportunity for us to say "THANK-YOU" to all of our loyal customers as well as suppliers. If you have not got your official invite yet, make sure you contact us to get your name on the list, and if you have already RSVP'ed, we look forward to seeing you on July 17th.

Annual Golf Tournament

Next up on the list is our Annual Golf Tournament. This has also turned into a highly anticipated annual event. This years big day is planned for Wednesday August 20th at the Granite Ridge Golf Club, www.golfgranite.com There will be an official invite going out in the next couple of weeks, make sure you contact us if you do not receive yours and are interested in attending. We expect this year to fill up again, so don't hesitate.

On going and completed Projects

- Enhancements to a recently installed automotive parts handling system are now being used in Western Ontario
- Sales of our new Dorner low profile conveyors are starting to take off thanks to our knowledgeable sales professionals
- A Western Canadian small parcel and letter sorting facility has started using a new portable design that will be used as a standard all across the country in the next short period of time
- A major cosmetics distributor has just expanded their existing sortation facility and upgraded the controls capability to allow for additional expansion if necessary in the near future
- A new in line check weighing system is now installed and running for a local steel supply company in Brampton
- Some of your favorite baked goods will soon be transported on a new vertical conveyor then automatically inducted and sorted on the high speed sortation equipment installed last year, production continues to grow at this Etobicoke Bakery.
- An automotive parts supplier in central Ontario is making use of some newly installed components that streamline their existing operation
- The design phase is now complete and manufacturing is underway for one of North America's largest suppliers of confectionary products. A new turnkey system should be up and running in the fall that will gather, accumulate, sort, palletize and wrap multiple products all automatically
- An order fulfillment distribution center for all those products you see on the infomercials late at night has taken advantage of some huge savings by using some used equipment we were able to modify into exactly what they needed for their order processing and shipping operation
- Supply of some new heavy-duty tabletop conveyor is being used for a corrugate processing system. These simple yet strong units were designed and manufactured in our shop from start to finish in less than 4 weeks
- Your favorite salad toppings will soon be conveyed and sorted on a newly designed conveyor that will transport and sort by size at the same time
- Installation is set to begin in the fall for a major apparel distribution center. The new DC will make use of single selective racking, a three level pick tower, carton flow, a material handling picking system, shipping and receiving conveyor and a direct to compactor trash handling system
- A central Ontario automation company is incorporating our new slip torque Shuttleworth conveyor into their system design

NBS 30 TURBO SORTATION EQUIPMENT

Turbocharge your Throughput

Sort your products at rates of up to 150 CPM and boost your throughput with the TURBO Sortation System. The technologies and controls that make up the TURBO System are designed to complement each other and provide you with excellent performance.

- The WAVE Diverter uses unique WAVE technology to divert product at high rates
- The TURBO induction system minimizes gaps on-the-fly
- The WAVE Aligner technology positions cartons for "two way" diverting while still maintaining gaps and rates
- The COMMANDER System Controls operate the TURBO with optimum efficiency and precision

Reduce the total cost of Ownership

The TURBO Sortation System is the very best value in the 100-180 CPM sortation range with many features that significantly reduce the total cost of ownership. No other system in this throughput range can compete in either price or reliability with the TURBO Sortation System.

- Eliminates the need for costly, high maintenance sliding shoe sortation equipment
- Inherent compatibility of mechanical and control systems saves on engineering, installation and commissioning costs
- Precise control results in less wear and fewer product jams
- Simple yet durable equipment design is forgiving under adverse conditions, reducing downtime
- Controls use readily available components and standard software for cost effectiveness and flexibility

You Get Complete Control

COMMANDER Controls are designed to command the very best performance, throughput and life from your TURBO Sortation System. Everything you need to know about your system can be quickly accessed through the comprehensive Visulation COMMANDER allowing you to respond quickly to almost any situation.

- System status and diagnostic information
- Key performance indicators
- System and device alarms
- Remote access troubleshooting
- Mechanical and electrical layout drawings
- Equipment manuals, spare parts lists and more
