WELCOME

To the third edition of What's Happening at Wecon Systems "WHAWS" newsletter for the year 2013. As this newsletter is being written the summer solstice that occurs on the day exhibiting the longest period of daylight has come and gone. Each day in passing now becomes marginally shorter. We continue to experience very seasonable temperatures and have yet to encounter the unrelenting heat and humidity typically associated with the days of summer. Employees and companies have begun to evaluate vacation schedules and are making arrangements to cover for those who are fortunate to have time off during this popular season.

Installation activities of our larger jobs are beginning to wind down as crews commence final commissioning and clean up. To date this year, our technicians have travelled from one coast to the other providing installation services in support of our customer's requirements. No matter what your requirement, we make it a point to find the time to support your day-to-day needs.

Our customer base continues to grow as business opportunities develop. We welcome all of our new business associates and existing customers alike. Please remember during the upcoming summer period, some of our suppliers like to take this opportunity to schedule summer shut downs. If you happen to be considering an upcoming project during this time period, please ensure your orders are released to us as soon as possible to avoid the possibility of a delay resulting from a pending summer shut down period.

As a single source integrator, feel free to contact us at any time concerning your material handling questions or requirements. Be sure to check out the news and events tab on our webpage on a regular basis to keep updated on our current business activities.

WHAT'S HAPPENING AT WECON SYSTEMS

On Going and Completed Projects

- Our technicians most recently endured a couple of long sessions to satisfy the installation requirements for two vertical lifts at a major retail outlet in downtown Toronto. Tackling new obstacles, our technicians had to transport the equipment through a series of underground walkways linking the inner city to the site. They worked around the customer's regular business hours to be as non-disruptive and to minimize delays in getting the customer operational.

WHAT'S HAPPENING AT WECON SYSTEMS

On Going and Completed Projects

- We have just completed the installation and commissioning of a major equipment upgrade that included a tilt tray Mark IV sorter at a major sportswear distribution center in the GTA.
- Our installers are in the final phases of the installation of equipment sourced and supplied by our customer in support of their requirements at a juice and bottling facility here in Toronto.
- For those projects on a tight budget we maintain a wide assortment of good quality used equipment that is available for sale. This provides the customer with the option of purchasing used equipment at significant savings over new equipment. Please remember on-hand quantities and used equipment inventories continually change and are subject to sales volumes. Contact us for details and equipment availability.
- Our sales staff and distributors have been extremely busy quoting and actively pursuing new business opportunities. They are always available to assist and answer any customer inquiry. They can be reached at Wecon Systems by calling (905) 624-6499 or alternately they can be contacted via e-mail at:

New Products

Dorner Manufacturing has just launched the model / series 1100 miniature belt conveyor. The conveyor comprises the smallest conveyor frame in North America. With a frame depth of just $\frac{3}{4}$ " the equipment is available in belt widths from 1-3/4" to 10" wide in lengths of up to 6 feet long. Its compact miniature design can be utilized for the conveyance of small or light weight products, medical or pharmaceutical applications. We are proud with our association with Dorner and serve as an authorized service center for their product line here in Canada. Give us a call and we would be happy to discuss how we can satisfy your material handling requirements and needs.

Up Coming Events

Please check our website or keep in touch with us for upcoming events. We can be contacted at info@weconsystems.com or at the office any time.
