WELCOME

To the fourth and final edition of What's Happening at Wecon Systems "WHAWS" newsletter for the year 2014. Although we didn't experience the unrelenting days of heat and humidity associated with our typical summers, the transition to fall is now upon us with each day visibly growing shorter and the nights becoming longer. The autumnal equinox otherwise known as the first day of fall (autumn) has come and gone. With the change in seasons, trees have begun and continue to change colours. As the summer draws to a close and the kids have gone back to school, we take a moment to look back.

This past summer our installation and service crews continued to keep busy. We want to thank our technicians and those sub-contractors who provided extra labour during this time. As the fall progresses, we look forward to getting back into a regular routine. As always, we continue to direct and manage our manpower requirements to best satisfy our customer's needs. We are fortunate that our team is comprised of a diversified group of individuals that can be called upon to help out during those busy times to keep up with our customer commitments.

The workload over the next few months continues to be very busy. If you have any upcoming projects we would be happy to discuss the opportunities with you or your prospective client(s). If you have a question or inquiry, don't hesitate to call. Please remember, we can always find the time to support your day-to-day needs and requirements.

To all of our customers and suppliers, thanks for supporting our requirements and allowing us to satisfy your material handling needs. Feel free to contact us at any time concerning your material handling questions or requirements. Be sure to check out the news and events tab on our webpage on a regular basis to keep updated on our current business activities.

NEW MEMBERS

This summer we have added several new members to our team of qualified individuals. Each individual brings with them new strengths to complement our team and to support our customer requirements.

New Sales Specialist

Kevin Pollard has joined our team of sales professionals. Kevin is eager to learn and develop his knowledge relating to conveyors, material handling equipment and requirements. He provides us with an additional contact to respond to your sales inquiries and requests. Kevin can be reached through the office at (905) 624-6499 ext 236, alternately on his cell phone at (416) 521-5511, or via e-mail at kpollard@weconsystems.com.

New Project Manager

Laza Radocaj has now joined our team to provide Project Support for our customers. He brings to us his knowledge and expertise in the Material Handling Field. Laza can be reached through the office at (905) 624-6499 ext 237, alternately on his cell phone at (416) 574-6530, or via e-mail at lradocaj@weconsystems.com. For those of you that know Laza and have had dealings with him in the past, take a moment to reacquaint yourself with him in his new domain.

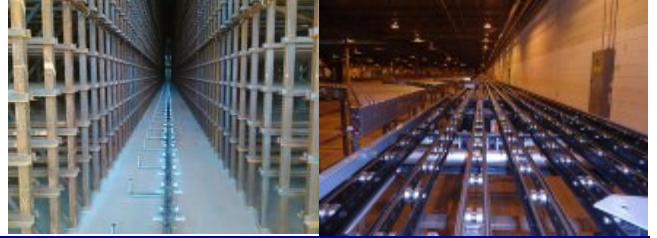

New Field Technician

Steve Poole has now joined us and has become the newest member of our installation and service team. He brings many years of experience to us from the conveyor field and will augment our installation and service team. He has been spending time at several of our current installations and has been called upon to provide support to service calls where ever needed. Steve can be reached through the office at (905) 624-6499, alternately on his cell phone at (905) 460-7488.

Please join us in welcoming Kevin, Laza and Steve to the company. For those of you that have not had the opportunity to meet these individuals please take a moment to call and say hi and introduce yourself.

Our team of professionals generates "Guaranteed Results".

Ongoing and Completed Projects

- We are in the final stages of the installation and commissioning of an Automatic Storage and Retrieval System for the freezer of a major bakery facility for the food service and retail market located in Metropolitan Toronto. Wecon was contracted to provide implementation and installation services that included (5) 60 ft high vertical storage and retrieval machines (SRM's) and the associated transportation conveyors.
- The decommissioning, reconfiguring and installation of a new transportation and sortation system at a retail distribution center in Scarborough continues. The new equipment utilized in this project is supplied by one of our business partners TGW-Systems. Wecon was utilized to supply the installation services and expertise in support of the project. Our veteran installers have coordinated all aspects of the installation activities for this project.
- The first of two car stackers in Toronto is in the final stages of installation and commissioning should commence shortly. Installation of the second unit will commence upon completion of the first unit.
- We were awarded the installation activities associated with a Mini Load Automated Storage and Retrieval System supplied our business partner TGW-Systems at the new distribution facilities for a hardware distributor in Kitchener. Our installers are providing the implementation and installation services that includes (5) 40 ft high vertical storage and retrieval machines (SRM's).
- We now have quite possibly the largest inventory of used conveyor in Canada available for sale at tremendous savings. Be sure to contact any of our professional sales staff for details about equipment types and sizes available before it's gone. Don't miss out on this limited time opportunity. Remember, by providing customers with the option of supplying used equipment in lieu of new equipment the customer can realize the benefit of significant cost savings over the purchase of new equipment.
